Julia Maria George

Automation Test Engineer @ Wipro Technologies | Test Automation
| Selenium | Python | Pytest | Cucumber | Jenkins
Kerala, India

Summary

I am a Software Test Engineer at Wipro Technologies with 4 years
of experience in manual and automated testing across firmware
and hardware environments. My role focuses on ensuring the
functionality, reliability, and performance of software products
through comprehensive testing methodologies. I design, develop,
and execute automated tests, leveraging my skills in Python and
Java to create and maintain test scripts, frameworks, and tools.

In addition to my technical expertise, I collaborate closely with
development and business teams to identify and resolve defects,
improve product quality, and ensure seamless project execution. I
take pride in delivering high-quality software solutions while reducing
manual effort and improving testing efficiency.

Currently, I am pursuing a Master of Technology (MTech) in
Software Engineering from BITS Pilani, which complements my
professional experience and strengthens my foundation in the
latest technologies. I am passionate about continuous learning,
automation, and applying innovative solutions to real-world
challenges in software testing.

Experience

Wipro
Test Engineer
September 2020 - Present (4 years 3 months)
Kochi, Kerala, India
